

Instructions for ordering the Saliva Collection Kit from DanteLabs for the Whole Genome Sequencing (WGS)

1. Go to <https://www.dantelabs.com/collections/our-tests/products/whole-genome-sequencing> and order the WGS test online. During checkout, enter the exclusive discount code for our members **SPECIALFMF&AID**, in order to get the special price of €199/\$229. Otherwise, you will pay the normal price of €549.

If you don't have a credit card, please send €199/\$229 to this Paypal account: andrea@dantelabs.com and provide an address where your Saliva Collection Kit can be delivered to.

2. The Saliva Collection Kit will be delivered to the address provided by you (it contains a Kit ID).

3. Fill out the online customized-request form before shipping back the sample. When filling out the form, you will also be requested to provide the unique Kit ID number found on the tube.

a) for Europe, fill out this form: <https://www.dantelabs.com/pages/get-your-customized-report>

b) for everywhere else, fill out this other form: <https://us.dantelabs.com/pages/get-you-customized-report>

For patients using the **SPECIALFMF&AID** code, DanteLabs will automatically generate the following report unless specified differently: ***primary immunodeficiencies, autoimmune and autoinflammatory diseases***, as well as the wellness and lifestyle report, and the pharmacogenetics report.

4. Please read carefully the instructions on how to do the test. Important is not to eat or drink anything for 30 minutes prior to doing the test. Try to do it preferably on a Monday so that it can be mailed the same day. No need to refrigerate your sample.

5. When mailing the sample, try to use express mail and most importantly, registered mail so that it can be tracked in case it gets stuck in customs.
